

Italian Polymers and Compounds for the Automotive Industry of the Future

May 14, 2025

10:30 AM - [Hungexpo Budapest](#)

Case Studies and Practical Applications

of the polymers and
thermoplastic
compounds developed
by these companies

Competitive Advantages

for the automotive
sector derived from
the use of high-
performance
materials

Collaboration Opportunities

with key players in
the Italian
production chain

*An event organized by Confindustria Ungheria with the coordination of our member
Silvia Merighi, Head of plastic sector*

The event highlights Italian excellence in high-performance polymer materials, focusing on the strategic role of Italian compounders in developing innovative solutions for the automotive industry.

Leaders in advanced thermoplastic polymers and compounds, Italian companies excel in combining innovation and sustainability, offering materials that enhance automotive component performance, reduce production costs, and meet ELV regulations.

The event will also include networking opportunities to foster synergies and strategic collaborations.

Sponsored by:

Hungexpo Budapest Congress and Exhibition Centre
Budapest, Albertirsai út 10, 1101 Hungary

Participation is free
but seating is limited
